

Fact sheet:

Super contributions, caps and Division D or E defined benefits

There are limits, known as contribution caps, on the amount that can be contributed to your super without incurring additional tax. These caps apply per person, regardless of how many super funds or accounts you contribute to or how many employers you have.

The following information helps explain how these caps work in relation to your defined benefit (DB) super. You may wish to use this information to review your level of employer and personal contributions. If your contributions exceed the applicable cap, you should be aware of any additional tax that may be payable.

Warning: It's your responsibility to ensure that you do not exceed the caps if you want to avoid paying extra tax. Based on information that all super funds must report each financial year, the Australian Taxation Office (ATO) determines if you have exceeded the contribution caps and advises you if any additional tax is payable.

General advice warning about using or relying on this information

The information is general information only and does not take into account your individual objectives, financial situation or needs. You should consider the information and its appropriateness, having regard to your own objectives, financial situation and needs, before making any decisions. You should seek professional financial advice tailored to your personal circumstances from an authorised financial adviser.

Taxation considerations are general and based on present taxation laws and may be subject to change. You should seek independent, professional tax advice before making any decision based on this information. The trustee is also not a registered tax (financial) adviser under the Tax Agent Services Act 2009. You should seek tax advice from a registered tax agent or a registered tax (financial) adviser if you intend to rely on this information to satisfy the liabilities or obligations or claim entitlements that arise, or could arise, under a taxation law.

Concessional contributions

Concessional contributions generally include super contributions from an employer, as well as any salary sacrifice (pre-tax) contributions you may make to your super.

For DB super, your employer's super contribution is represented by a Notional Taxed Contribution (NTC). Read more on page 2 about your NTC, including how it's calculated.

Concessional contributions cap

The following rules apply to concessional contributions:

- For 2020–21, a cap of \$25,000 (gross of tax) per financial year applies for concessional contributions, regardless of your age.
- Concessional contributions up to the cap are taxed at 15% if your income, as defined by the ATO for the purpose of this cap, is \$250,000 or less – these are known as low-tax contributions. If your income is more than \$250,000, concessional contributions are taxed at 30%. If your income exceeds this \$250,000 threshold only as a result of including your concessional contributions, the higher tax rate only applies to the portion of contributions exceeding the threshold.

For Defined Benefit members and pensioners:

or email via oursuperfund.com.au/login

Post to **GPO Box 4303,**
Melbourne VIC 3001

- You can receive or make concessional contributions above the cap but the amount of these excess contributions is included in your assessable income and taxed at your marginal tax rate plus Medicare and any other applicable levies, with a 15% tax offset entitlement for contributions tax already paid. An interest charge also applies. This additional tax is levied on you by the ATO. Excess concessional contributions also count towards your non-concessional contributions cap (page 4).
- If you exceed your concessional contributions cap, you may be able to choose to withdraw up to 85% of your excess contributions. You can't withdraw any compulsory contributions made to your DB division, but you can request to withdraw any voluntary excess contributions made to a separate accumulation-style account. Released contributions no longer count towards your non-concessional contributions cap.

Carry forward unused concessional contributions cap amounts

You may be eligible to contribute more than the general concessional contributions cap by making use of any unused portion of your cap from previous years. To take advantage of carry-forward contributions, the following rules apply:

- The first year you are entitled to carry forward unused amounts is the 2019–20 financial year, by carrying forward any unused amount from the 2018–19 year.
- You must have a total super balance¹ of less than \$500,000 on 30 June immediately before the year in which you intend to contribute.
- Unused amounts are available for a maximum of five years, after which they expire.

For example, your concessional contributions during 2019–20 totalled \$10,000, leaving an unused amount of \$15,000. During 2020–21 you could therefore make concessional contributions of up to \$40,000, calculated as the general \$25,000 cap plus your \$15,000 unused amount.

Using a Notional Taxed Contribution for employer contributions in DB super

For DB super, your employer doesn't contribute a percentage of your salary to your super on a regular basis. Instead, your benefits are determined using a formula that may take into account factors such as salary, length of employment or fund membership, or member contribution rate. The amount that your employer must contribute towards your DB super is based on an actuarial calculation and this must be at least equal to the minimum super guarantee (SG) requirements.

You do, however, need to know an annual 'amount' of employer contributions to help consider your position against the concessional contributions cap each year (page 1). For this purpose, a **Notional Taxed Contribution (NTC)** is calculated to represent your employer's super contributions in respect of your DB super.

The following NTC information is specific to DB super within Division D or E of our fund. If you receive or make contributions to another super account or fund, you need to consider the information below in conjunction with your other super arrangements.

How your NTC is calculated

The formula for calculating an NTC is defined by super law, generally as $[(\text{Your Super Salary} \times \text{NTC Rate}) - \text{Member Contributions}] \times 1.2$, where for the financial year:

- Super Salary** is your annual super salary² on the first day of the financial year, expressed as a full-time equivalent amount. If you work part-time, refer to the following section outlining how your NTC is adjusted.
- NTC Rate** is the rate that applies for your membership division and benefit category in our fund, as set by the fund's actuary based on the current SG rate of 9.5% – take care to refer to the correct division and rate that applies to you below:

Division D members	
Benefit category description	NTC Rate
All members	14%

Division E members	
Benefit category description	NTC Rate
If you contribute at 0% of super salary	5%
If you contribute at 2% of super salary	6%
If you contribute at 4% of super salary	8%
If you contribute at 6% of super salary	10%
If you contribute at 8% of super salary	12%

For Division E, if you change benefit categories during the financial year, your NTC calculation is pro-rated for the time spent in each category.

- Member Contributions** is the amount of compulsory member contributions you make on an after-tax basis to your DB super during the financial year. It's important to keep in mind that your after-tax member contributions are deducted when calculating your NTC for the purposes of the concessional contributions cap. However, your after-tax contributions still count towards your non-concessional contributions cap (page 4).

1 Your total super balance is the sum of the following benefits: (i) all accruing interests in a DB fund, (ii) all accumulation super accounts, (iii) all retirement account-based pensions or transition to retirement income streams, (iv) all non-account based income streams included in your transfer balance cap, and (v) any benefits not included in previous categories because they're in transit between funds on the day of measurement. Your total super balance is generally calculated as at 30 June each year.

2 The calculation of 'super salary' is defined by the Group, as your employer, for the purpose of calculating your DB entitlements. This may not be the same as your cash salary. Contact us for more about your super salary.

Example 1 – Division D member: As at 1 July 2020, your super salary is \$75,000 and you make after-tax compulsory contributions of 6% of your super salary, totalling \$4,500. Your NTC for 2020–21 will be $[(\$75,000 \times 14\%) - \$4,500] \times 1.2 = \$7,200$. This amount counts towards your concessional contributions cap for the year.

Example 2 – Division E member: As at 1 July 2020, your super salary is \$75,000 and you make after-tax compulsory contributions of 4% of your super salary, totalling \$3,000. Your NTC for 2020–21 will be $[(\$75,000 \times 8\%) - \$3,000] \times 1.2 = \$3,600$. If you choose not to make member contributions, your NTC is based on a contribution rate of 0% and will be $[(\$75,000 \times 5\%) - \$0] \times 1.2 = \$4,500$.

If you're a part-time employee

Your NTC calculation is adjusted based on your average ratio of part-time to full-time employment during the financial year. Your NTC formula is $[(\text{Annualised Super Salary} \times \text{NTC Rate} \times \text{PT ratio}) - \text{Member Contributions}] \times 1.2$, where *NTC Rate* and *Member Contributions* are the same as the definitions above, and:

- **Annualised Super Salary** is your annualised super salary on the first day of the financial year
- **PT Ratio** is the average ratio of your part-time to full-time employment, e.g. if you work 2 days per week, your ratio would be 2 days ÷ 5 days = 0.4.

Example 3 – Division D member: On average you work 2 days per week with a super salary of \$20,000, annualised to \$50,000, and you make after-tax compulsory contributions of 6% of your super salary, totalling \$1,200. Your NTC for 2020–21 will be $[(\$50,000 \times 14\% \times 0.4) - \$1,200] \times 1.2 = \$1,920$. This amount counts towards your concessional contributions cap for the year.

Circumstances where your NTC may be zero

Under super laws, your NTC calculation is zero if you're no longer accruing DB super, either temporarily or permanently. This might be the case if:

- You're a Division E member who has reached your maximum accrued benefit multiple and your DB super is higher than the minimum required under SG laws.
- You have a period of leave without pay and temporarily stop accruing benefits.
- You're over age 65 and your DB super is higher than the minimum required under SG laws.
- You leave employment with the Group, including where you become a deferred/post-employment member of your DB division, or you exercise choice of super fund.³
- You're receiving a pension from your DB division.

Where any of these apply for part of a financial year, an NTC still applies for the portion of the year in which you were accruing benefits.

Circumstances where your NTC may be limited to the concessional contributions cap

In some cases, special arrangements may apply if your NTC exceeds the concessional contributions cap.

Your NTC is generally limited to the concessional contributions cap, and no additional tax is payable on the portion that would otherwise be excess contributions if **all** of the following conditions apply to you and have done so since 12 May 2009:

- You haven't changed to a benefit category, as defined by super law for Division D or as shown in the table on page 2 for Division E, to result in an improved benefit level, such as changing to a higher contribution rate.
- The rules of the super fund haven't changed to result in an improved benefit level, unless to comply with SG rates.
- The method of calculating your super salary hasn't changed to result in a higher salary, unless to comply with law.
- Your super salary has not increased by more than 50% over any 12-month period or by more than 75% over any three-year period unless your employer advised us that such an increase was on an arm's length basis.
- No other event has occurred, as set out in the regulations, that has the effect of improving your benefit level.

For example, if you meet all of these conditions and your NTC for the financial year is calculated as \$30,000, your NTC is capped at \$25,000 and no excess contributions tax will be payable on the additional \$5,000 of your NTC that exceeds the cap.

Important (applies to Division E only): Your NTC is still limited to the concessional contributions cap if a change in benefit categories in the future or since 12 May 2009 means a reduction in your benefit accrual. For example, changing your contribution rate from 6% to 4% reduces your benefit accrual, so the limited cap still applies to you. However, changing your contribution rate from 6% to 8% improves your benefit accrual, so your full NTC amount applies.

³ If you exercise choice of fund, the Group generally starts making regular super contributions to a super account for you. In this case, the value of those employer contributions counts towards your concessional contributions cap.

Applying salary sacrifice contributions against the cap

You can't make salary sacrifice contributions to your Division D or E super. However, if you make voluntary salary sacrifice contributions to another super account, you must add these contributions to your NTC, or the limited NTC if applicable above, to determine your total concessional contributions for the year.

Example 4: Using the details from example 1, based on Division D member, your NTC for 2020–21 is \$7,200. If you also salary sacrifice \$15,000 to another super account, your total concessional contributions for the year will be the sum of your NTC plus your salary sacrifice contributions, or $\$7,200 + \$15,000 = \$22,200$. This is the total amount that counts towards your concessional contributions cap.

Non-concessional contributions

Non-concessional contributions include any after-tax contributions to your super, including any compulsory or voluntary contributions you make on an after-tax basis to your DB super (if available) and/or to another super account.

Non-concessional contributions also include contributions for which you are entitled to but do not claim a tax deduction. You are not eligible to claim a deduction for any after-tax contributions to your DB super, but if you also contribute to an accumulation super account, these contributions may be eligible.

Non-concessional contributions cap

The following rules apply to non-concessional contributions. Remember that any excess concessional contributions (page 1) also count towards your non-concessional contributions cap.

- The non-concessional contributions cap that applies to you for 2020–21 depends on your total super balance¹ as at 30 June 2020:
 - If your total super balance was less than \$1.6 million, a cap of \$100,000 per financial year applies to non-concessional contributions, including any excess concessional contributions. No tax applies to contributions up to this cap.
 - If your total super balance was \$1.6 million or more, your non-concessional contributions cap is zero for the financial year, so any non-concessional

contributions you make for the year, including compulsory contributions to your DB division and any excess concessional contributions, count as excess non-concessional contributions.

- You can make non-concessional contributions above the cap but the amount of these excess contributions is taxed at the top marginal tax rate plus Medicare and other applicable levies.
- If you exceed the non-concessional contributions cap, instead of incurring the top marginal tax rate, you may be able to choose to withdraw the excess contributions. In this case, an associated earnings amount is calculated to approximate the amount earned from your excess contributions in the super fund and this earnings amount is included in your assessable income. You can't withdraw any compulsory contributions made to your DB division.

Bring forward non-concessional cap amounts

If you're under age 65, you may be eligible to bring forward your cap entitlements from future years in order to contribute up to three times the non-concessional contributions cap during a single year or within the bring-forward period.

The amount you can bring forward and the length of the bring-forward period depends on your total super balance as at 30 June immediately before the financial year in which you made the contribution that triggers your bring-forward period.

Any additional contributions you make above the higher cap during the bring-forward period are counted as excess non-concessional contributions.

The use of the bring-forward rules may have tax implications for your compulsory DB contributions in future years – contact us for more on these rules if needed.

Applying after-tax contributions against the cap

If you make any after-tax contributions, including compulsory contributions to your DB super or voluntary contributions to either your DB super and/or to another super account, these contributions count towards your total non-concessional contributions for the year.

Example 5: Your super salary is \$75,000 and you make after-tax compulsory contributions at 6% of your super salary, totalling \$4,500. This amount counts towards your non-concessional contributions cap for the year.

How to change your contribution arrangements

Warning! Before making any changes, it's important that you read and understand this information with regard to your own individual objectives, financial situation and needs. You should seek professional financial advice tailored to your personal circumstances from an authorised financial adviser and/or tax advice from a registered tax agent or a registered tax (financial) adviser.

If you decide to change your contribution arrangements, you can choose any one or more of the following options:

- Applies to Division E only: You can select a compulsory contribution rate of 0%, 2%, 4%, 6%, or 8%. To change this rate, complete our *Change of contribution rate* form available from oursuperfund.com.au/forms.
- If you want to make voluntary salary sacrifice or after-tax contributions to an Accumulate Plus account in our fund:
 - To begin or change salary sacrifice arrangements, log into SideKick and navigate to Pay & Benefits > View my benefits > Change Benefits, and complete the online form.
 - To begin or change voluntary after-tax contribution arrangements via payroll deduction, log into SideKick and navigate to Pay & Benefits > View my benefits > Change Benefits, and complete the online form. Alternatively, you can make after-tax contributions direct to Accumulate Plus account via BPAY® or direct credit – read the *Reference Guide: Contributing to your super* for Accumulate Plus from oursuperfund.com.au/pds for more information.
